

WORLD FUTURE LEADERS

TOGETHER WE ARE SHAPING THE FUTURE

INTRODUCTION:

In many countries, especially in 3rd World, there are many young people who, due to the economic situation, which we expect will worsen, but also because of other factors, will not have the possibility of an academic or business career. This is also why we want to connect young people from all over the world as best as possible and integrate them into an initiative whose goals are exclusively cooperation, exchange of experiences, and helping those who, due to the aforementioned reasons, would otherwise have no chance of development and career, deserve it. Everyone deserves it.

The idea is to attract the participation of universities from different parts of the world, as well as other institutions and organizations, including various NGOs, which can participate in greater involvement of young people.

ABOUT THE PROGRAM:

At the Global Chamber of Business Leaders, we want young people all over the world to have opportunities for quality education, intellectual development, and business success, which is why, within the framework of the Young Business Leaders Program, we have developed a sub-program dedicated to the intellectual and spiritual growth of young people, raising self-confidence, and gaining experience, which we called "Future Leaders":

The Young Business Leaders Program is a platform for building young business and opinion leaders, generated by the Global Chamber of Business Leaders as the world's leading coalition of business and governmental leaders.

Over 100 young delegates are trained with the help of the experience and knowledge of senior business leaders who operate in various segments of the Global Chamber of Business Leaders.

With the Future Leaders sub-program, we want to address all young people around the world, both those who have the best conditions for education and growth, as well as those who unfortunately do not, but have a great desire to succeed. We will offer them the experience and guidance of both young mentors, mentored by the best mentors, and senior mentors - top global leaders.

HOW IT WORKS:

On the top virtual platform, we will initially offer lectures, which will be more than just that, by top political, business, as well as religious leaders; celebrities from the film industry, music industry, globally known online influencers, etc. The task of the lecturers will be to be as practical as possible, to share their experiences on the path to success, and to guide young people.

We will also offer our own CRM platform of a social network, where they can connect with each other, as well as ask questions, and look for solutions together with experts from certain fields.

FIRST AND MAIN OBJECTIVE:

The first and main goal of the whole sub-program or idea is to offer young people the most that we can share with them, and that is the time, knowledge, and experience of those who have successfully walked the path that they have already or will try to reach themselves.
